

Do Your Part Recycling Winter Newsletter-2009

It is time again for our semi-annual update to all our clients. We purchased a new baler in November. This allows us to ship our material directly to Paper mills. Which eliminates the shipments to Prince Rupert. I would like to thank the Regional District of Prince Rupert for the support they have shown us over the last 3 years!

Commodity prices are still very low and are projected to stay so for some time yet, however we are committed to serving our clients as best as possible. With saying that we are accepting glossy paper again!

Hints:

We sort on an average of 700 bags per month, there are a few things that we can all do to make recycling in Terrace more productive. We can start by putting all the tin and plastics together in a small bag inside the big bag. I know some of you already do it and it is a great help!

Remember with the coming holidays that wrapping paper is recyclable and the hard plastic that covers toys and is common packaging is NOT. And if you miss a pick up then you can put that missed bag out on the very next pick up.

Did you know you can return your computers and televisions to the Terrace Return it Center.

Thanks to all of you we are diverting over 20 tons of material every month!

Thanks again for all of your support in the past years and future. Have a safe and Merry Christmas.
